Just as an intelligent housewife would not needlessly expose any highly perishable food to the temperature of a kitchen in summer weather, before the instant of its use, so Henrici skilled workers observe extreme caution in all such matters affecting the welfare of patrons.

* * *

They bear in mind, for instance, that when part of the content of a bottle of milk is used the remainder must be securely covered and returned to the nearby refrigerator immediately. Why should you ever patronize any sort of restaurant in which food of any kind is needlessly exposed to contamination?

Henrici's, the finest restaurant of its type in all the world, unfailingly contributes tremendously important values of which many of its patrons are not even aware but by which all profit.

their lives on the field of battle against reliow fever. Dr. Stokes was in Nigeria, southwest Africa, in the service of the international health board, endeavoring to rout yellow fever from its great primary source.*

It will be remembered when Dr. Gorgas retired from the army he planned to run yellow fever down to its last stronghold as a climax for his life work. He had always been of the opinion that this would prove to be South or Central America. A year or two in these countries had proved Bufficient for the solution of their major yellow fever problems. He began to be convinced that he had been in error in thinking this continent the natural home of yellow fever, and he had begun plans to low fever, and he had begun plans to search out the west coast of Africa, the old fatherland of American slavery, as the nesting place of the disease.

Since his death the international health board has sent expeditions of disease discovery over. Dr. Stokes was a member of one such band. Just before he died, he, in connection with Drs. Bauer and Hudson, made some very important discoveries. These they wrote for the American Journal of Tropical Medicine.

They succeeded in causing yellow fever in two varieties of monkeys, one of which is the relatively cheap rhesus. It tin to protect against and to cure

Volunteer in yesterday's TRIBUNE pre-sents a striking contrast to the policies sents a striking contrast to the policies of sound and adequate preparedness usually fostered by your paper. and responsibility as great as that of
a physician. Officers of field and general grade have under their charge men
and equipment comparable to executives of large corporations.

War is not a thing of parade and pomp and promotion as Volunteer would have it. Therefore it is pertinent to command. So far as my experience goes, it is not. You would not place yer who practiced his procession only two weeks every three years, supple-mented by a few evenings each winter devoted to elementary instruction and social diversion. Yet this is more than

pable of filling field grades, but the new blood never can be so qualified under present training methods. They come to the reserve with only a very elementary knowledge of military science, gained in a brief course which is a side line to their main college career. After graduation much more than ordinary opportunity is required merely to keep one from forgetting what one has already learned.

Volunteer's criticisms of instruction methods are well taken and have been remedied for the most part. The reserve officer wants promotion and should get it, but not at the expense of military efficiency. If I should be of military efficiency. If I should be called to active duty after the old-timers have retired, it would be my wish to serve under a regular who was well trained in military science rather than a paper officer whose chief quali-fication was his efficiency in solving blackboard problems. The scene is your bedroom. The time is a sultry summer night. The _ drams _ you, trying to sleep . . . The blanket feels much too hot _ off it goes. You are covered with only one sheet. Then the first light breeze makes sheet. Then the first light breeze makes you shiver. Up you pull blanket and sheet again . . . and the sleep-robbing game of too-hot-too-cold starts anew. In the morning you are sleep-starved and weary.

If you could be both cool and comfortable, neither too hot nor too cold, you could sleep—and summer nights wouldn't be so bad!

There is a simple way: Don't use a unket. Instead, sleep under TWO Pequot

There are two important reasons for doing this: first, the two sheets are light.

Therefore, you have a COOL covering.

Second, between the two sheets is a layer of still air. Scientists have found

that this acts as a temperature regulator between you and sudden temperature changes. Doctors say that these changes are one of the most frequent causes of summer colds. The two-sheet covering protects you. Therefore, the two-sheet

covering is a HEALTHFUL covering.

To carry out this new idea you will probably need only a half-dozen extra Pequot sheets. Figure your total supply for each bed at 6, rather than 4. Get these sheets now __ for two reasons: first, you never know when a sudden hot spell may come; and second, shopping is now comfortable and the stores are wellstocked....

Cool, comfortable, well protected sleep! Under TWO Pequot sheets you will get it, and awake keen and refreshed.

> Why Pequot sheets are the most popular in America

Tust take the firm, smooth Pequot fabric between your fingers. How soft it ishow fine and full-bodied! Immediately you realize why Pequot sheets are so cool and comfortable.

Most women value even more the way Pequot sheets wear and wear. They write us that their Pequot sheets have worn 8 years, 10 years, and even longer.

Right now - get your Pequot sheets for summer use, and use thruout the years!

sheet below, TWO sheets above-for com fortable, healthful sleep on hot nights!

THE DELINEATOR HOME INSTITUTE stically endorses this idea. Mildred Maddox Bentley, director, reports:

"This third sheet serves as a pri

LOCK WATCHING THEN ITS A KIMBALL

Children like to practice when the piano is a Kimball. Its appealing, colorful tone—so loved by artists—stimulates their natural talent, lending beauty and interest to the simplest studies or scale. And its readier, smoother action makes playing easy—even for untrained hands. Give your children the benefit of this extra help.

.The Kimball Junior is the ideal children's piano

A children's size upright—but a genuine Kimball—complete scale—88 notes and full tone! Just three feet eight inches high, this graceful little piano is the favorite instrument for small apartments as well as nurseries and schools. Admirable musical performance makes it a joy to adults as well as children.

In oak, walnut or mahogany finishes—and in green, ebony, ivory white or battleship gray art lacquers. A hand painted Mother Goose panel—of irresistible appeal to any child—or other decorative touches may be made to order.

CADILLAC'S CODE AS APPLIED TO **USED CARS**

Cadillac sanctions only one set of principles in selling automobiles — whether you are interested in a new or a used car.

We market used cars according to the long established Cadillac code. May we show and demonstrate some of these that are now on our floor? Thoroughly rehabilitated and vouched for, you cannot find equal value in new cars at corresponding prices.

ONE WOMAN BOUGHT SHOES FOR HER CHILDREN WITH IT

She rented her coal bin to her Anthracite dealer for the summer months. Ask your dealer to tell you about it.

TOMEN are a very important factor in the business of the Anthracite coal dealer.

One woman said recently that she found out that by buying her winter's supply of coal in the early summer she made money by it. She could buy it for so much less than in the fall or winter. That she saved enough to buy summer shoes for her two boys. 'It is just like renting my coal bin to my coal dealer for the summer," she said.

Therefore, this suggestion to the

Take up the question of your winter's supply of Anthracite coal now when prices are lowest.

Talk to your Anthracite coal dealer

and tell him just when you want it delivered. He is not rushed now -he will be later.

Maybe you are having an afternoon party when the noise of coal being shot into the cellar wouldn't add much to the occasion. Your local Anthracite coal dealer will be glad to suit your own convenience. He will deliver your coal at exactly the time you want it.

He can do that now. He couldn't possibly do it in the rush of the late fall.

Then, too, you will get better coal now because it comes to you in the same fine condition it leaves the mines, undamaged by snow and ice. And you will be independent of winter transportation troubles.

Be sure to consult your Anthracite dealer about your coal and furnace problems. Are you sure you are using the right size of Anthracite?

Congratulations, Good Housekeeping! But why the

Homes like this, purposely omitted in the Good Housekeeping Survey, buy 55% of all retail merchandise. True Story goes into these homes practically unduplicated, reaching 2,200,000 families with a buying power of more than 5 billion dollars.

etour!

Homes like this, covered in the Good Housekeeping Survey, buy less than 45% of all retail merchandise. The people who live here read many national magazines.

NOOD HOUSEKEEPING, with the impartial J assistance of nineteen leading advertising agencies, has just investigated the magazine reading habits of families whose homes range in value from \$12,000 to \$45,000.

o fountains

RDEN

ntancy

This investigation is a fine job. It proves conclusively that these families read many national magazines but that Good Housekeeping is their outstanding favorite.

But there is a more modest type of home which this survey deliberately ignores (as stated on page 1 of their report)-the home of the skilled workman and artisan -the True Story home.

Thus True Story, although having a far greater circulation than Good Housekeeping, hardly appears in the results, proving conclusively the contention we have always made that its circulation is concentrated in the homes of the wage earners.

What the Skilled Worker's Home Means to the National Advertiser

Government figures prove that the wage earning group represents the bulk of the Nation's buying powerwhose annual purchases are 55% of all the merchandise. sold in this country.

These people are prosperous and thrifty. In their homes you will find radios, motor cars and up-to-date electrical appliances.

What Do These People Read?

Good Housekeeping's recent survey, thorough and conclusive in its field, expressly omits this important group.

That is all right for Good Housekeeping, but no national advertiser can afford to forget these people. His problem is how to reach them. For they unquestionably offer the richest and readiest market to any manufacturer whose fortune rests on mass selling.

There is one magazine supreme in this field and that magazine is True Story.

These Factors are Vital to Every Advertiser

True Story is the favorite magazine of the great wage earning class of America. It is the only magazine specifically edited for them!

There are two million, two hundred thousand of these True Story families.

They have a combined annual buying power of more than 5 billion dollars. They spend more than 2 billion dollars for food.

A third of True Story families own their own homes. Half of them own cars. (The average age of men and women who buy True Story Magazine is thirty.)

Advertisers using 5 leading women's publications reach only 18% of the True Story readers. Eight leading magazines reach only 25% of them.

Impartial surveys by the A. N. A., Eastman and Curtis have shown this to be true.

Most Responsive of All to Advertising!

The big national mail order advertisers have long found True Story an amazingly responsive medium. The Spear Furniture Company sells \$40 to \$60 items at 1/3 less cost in True Story. Kalamazoo stoves find True Story, readers "very responsive" at \$85 per sale. Aladdin Houses use full pages at a profit in True Story.

In the toilet goods field: Lux Toilet Soap as well as Lux Flakes found this market eager for better ways of working and washing. nn Light 1992 bas in the tribe sharped

Listerine discovered their eagerness for better health and sanitation. Pond's Creams, Squibb and Cutex found enthusiastic reception.

More recently food advertisers such as Post's Bran Flakes, Jell-O, Mazola, Borden, Carnation, Fleischmann, and Seald-Sweet are winning True Story readers from the casual purchase of private brands.

We have an interesting story to tell any national advertiser who sees opportunity in this great new True Story market.

Complete facts and figures are available in a handsome, new book entitled "The New Family Market." Write for it on your letterhead today. True Story. 1930 Broadway, New York City.

Woodbury drove a brilliant race at this point. He was trying to nose past Duray and get started on the task of picking up the first two and a half mile gap. He had no luck at this maneuver, however, and the end of the first 100 miles found him 100 yards behind Duray with two full lace between them.

At the 250 mile post the remaining 21 cars were strung practically all the way around the big oval. Speed was gradually fading but still exceeding previous records. The average stood at 102.932, with Gleason leading, Gulleta second, and Moore third.

COMMON STOCK PRIVILEGE

Mr. John H. Carpenter, President of the Corporation, has summarized in part his letter as follower

CONSTRUCTION AND LOCATION: Lincoln Forty-Second Street Corporation, incorporated under the laws of the State of New York, will own in fee simple one of the largest office building sites in the City of New York, located on the south side of 42nd Street between Madison and Park Avenues, directly facing Vanderbilt Avenue and diagonally across from the Grand Central Terminal. This site has an area of 42,051 sq. ft. with frontage of 181.5 feet on 42nd Street, 179.75 feet on 41st Street and 49.75 feet on Madison Avenue.

Lincoln Forty-Second Street Corporation will erect on the site a fifty-two story office building of most modern fireproof construction, to be known as the Lincoln Building, which will tower approximately 640 feet above the 42nd Street level and be one of the tallest and most imposing structures in the city. The building will contain approximately 915,000 sq. ft. of rentable area, and is designed to be one of the finest office buildings in the country. It will be located in the center of the rapidly developing 42nd Street zone in the heart of the uptown business and banking district, with proposed underground connections with the subway and Grand Central Terminal, thus avoiding the necessity of crossing 42nd Street at one of the most congested points in the city. It is officially reported that for the year 1927 the passenger traffic of the New York Central and the New York, New Haven & Hartford Railroads in and out of the Grand Central Terminal exceeded 43,900,000 passengers. The demand for high grade office building space and for shops and stores in this very accessible location has been definitely established. The building will be constructed by Dwight P. Rebinson & Company, Inc.

VALUATION: These 6½% Debentures, to be issued under and secured by a Trust Indenture with The Chase National Bank of the City of New York, as Trustee, will be a direct obligation of Lincoln Forty-Second Street Corporation, subject only to the \$16,000,000 First Mortgage 5½% Sinking Fund Gold Loan due 1955, and will be followed by \$1,600,000 6% Purchase Money Notes (with sinking fund) due 1935, \$3,500,000 7% Preferred Stock and 600,000 shares of no par value Common Stock. On or prior to the execution of the Trust Indenture, Dwight P. Robinson & Company, Inc. will deliver to the Trustee its guaranty of the payment of the interest on these 6½% Debentures for a period from June 1, 1928, to the expiration of three years after the completion of the building, and also its guaranty of the completion of the building in accordance with architect's plans and specifications. The value of the land, as represented by the cost thereof, together with the estimated cost of the building, with carrying charges, including interest and taxes during construction but exclusive of discounts on securities, is estimated by Dwight P. Robinson & Company, Inc. at \$25,200,000. Charles F. Noyes Company, Inc., representing the Bankers, has estimated the value of the land and the building when completed at \$25,869,000.

**EARNINGS:* Separate estimates of the earnings of the completed height.

EARNINGS: Separate estimates of the earnings of the completed building have been made by Dwight P. Robinson & Company, Inc., Pease & Elliman, Inc., and Albert B. Ashforth, Inc. An average of all three estimates shows, after allowing for 10% vacancies and property taxes, and after deduction of interest on the First Mortgage Loan, net revenue available for Debenture interest and depreciation of \$1,560,027, or 4.36 times the annual interest requirements of \$357,500 of these 6½% Debentures. The lowest estimate is that of Albert B. Ashforth, Inc., representing the Bankers, and shows, after allowing for 10% vacancies and property taxes, and after deduction of interest on the First Mortgage Loan, net revenue available for Debenture interest and depreciation of \$1,422,500, or 3.98 times the annual interest requirements of these 6½% Debentures.

SINKING FUND: The Indenture will provide for a cumulative sinking fund of different rates, commencing June I, 1933, which is calculated to be sufficient to retire more than \$4,000,000 principal amount of Debentures of this issue by maturity.

These Debentures have been listed on the Boston Stock Rachange

These Debentures are offered when, as and if issued and received by us and subject to approval of counsel, Messrs. Rushmore, Bisbee & Stern, for the Bankers, and Messrs. Stoddard & Mark, for the Corporation. It is expected that temporary Debentures will be ready for delivery on or about June 12, 1928.

lence of ports, and in the past winds and ocean currents, have determined ocean ship lanes.

The American terrain determined the course of rai-road lines and in many cases built cities, where rail-roads had to converge.

Early railroads ran out of Chicage and built into the city because of the strategic location of the city relative to lake transit and access to the west. Later railroads and highways came to share in the traffic already made possible.

the advantages of an early start in the new traffic, the city which desires to create the habit of traveling to it by plane, cannot rely either on geography or population. It must be quick to get and vigilant to keep air lines. And air lines mean emergency landing fields, lights—ground equipment running into

In the establishment of air lines Chicago has a chance to realize its commanding continental position and to overcome old established trade routes and habits which grow out of history rather than nature. Our railroads have been oriented east and west with a heavy tilt toward the four great North Atlantic ports.

In the new transport, this need not be repeated, but New York has a pow-erful voice in rails, and that must be reckoned with in the growth of com-plination air and rall routes. We find that New York is attempting to repeat the old rallway orientation in the air. New York's all air route to Atlanta, not so geographically valid as a Chi-ago-Atlanta route, is an instance of now New York is working to supplement her favorable railway setting with

Eight established air routes in the United States are now making an operating profit. The variety of services which can make money is indicated by the varying plans mile coots of these lines, which vary from 11.6 cents to \$1.52, with an average plane mile cost for the eight lines of \$4.7 cents.

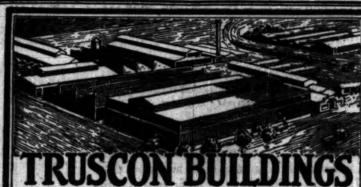

Blah and ballyhoo are of little value to a city in promoting air traffic for the reason that there is probably much less enthusiasm among the masses than is generally supposed. One of the first

Four Reasons for Buying H. O. Stone Bonds

Safety: H.O. Stone First Mortgage Real Estate
Bonds are secured by well-located properties earning sufficient income to pay all expenses, bond interest and sinking fund requirements and leave an ample margin of safety. They are surrounded by all the safeguards which our years of experience have proved desirable.

Stability: Stone bonds are far removed from market rumors, "bull and bear" raids and pools. They have proved sound, safe and desirable in periods of depression as well as in times of prosperity.

Good Yield: Stone bonds, despite the falling trend of interest rates, can still be purchased on a basis to yield as high as 61/%.

Reputation: The careful investor looks well not only to the quality of his securities but also the character of the house from which he buys. The House of Stone, originated in 1835, has proved its stability, integrity and ability to render valuable service to investors.

"Personal Records" System

-for men of affairs

HERE is a simple, workable plan by which you or your secretary can keep records from day to day which will provide you at any time with an accurate statement of your personal financial condition. It requires no bookkeeping knowledge and surprisingly little time.

This system is based on a study of methods used by business men who have developed satisfactory personal records systems, as well as on our own extended experience in such matters. It includes all necessary records and yet is flexible enough to meet the needs of most men—even those of substantial affairs.

We shall be glad to send you on request a sample set of facsimile forms, showing exactly what records are included and giving a brief explanation of their use. Then if the system appears applicable to your situation, you may have—without cost or obligation—the blank forms necessary to meet your requirements, all in a durable cardboard loose-leaf binder. Rumors have been in circulation that the President is thinking of convening congress in special session for the purpose of considering farm legislation. It is known, however, that the President ordinarily does not like special sessions and the farm leaders in congress insist that such procedure would be futile.

The President in his veto message on the McNary-Haugen bill said that

ILLINOIS MERCHANTS TRUST COMPANY, CHICAGO, TRUSTEE

The Minneapolis, St. Paul & Sault Ste. Marie Railway Company is controlled by the Canadian Pacific Railway Company through ownership of a majority of the capital stock and gives that company its chief entrance into the United States. It connects the Canadian Pacific system with Minneapolis and St. Paul, and over the Wisconsin Central Railway gives the system its entrance into Chicago. The Wisconsin Central Railway Company is controlled and operated by the Minneapolis, St. Paul & Sault Ste. Marie Railway Company.

These certificates are to be issued under the Philadelphia Plan by the Illinois Merchants Trust Company, Chicago, Trustee, against miscellaneous new standard railway equipment costing approximately \$1,729,600. As the railway company will make an initial payment of approximately \$469,600, this issue will represent less than 75% of the cost of the equipment.

Title to the equipment will be vested in the Trustee to be held for the benefit of the certificate holders until payment has been made to the Trustee of the full amount of the certificates together with dividend warrants and all other charges. The equipment is to be leased to the railway company for rental sufficient to pay the principal of the certificates and the dividend warrants, insurance, repairs and all other charges of the trust as they may come due.

The above certificates are offered for delivery when, as and if issued and accepted by us, subject to the approval of the issue by the Interstate Commerce Commission and by our counsel. It is expected that interim receipts of Illinois Merchants Trust Company, later exchangeable for Definitive Certificates, will be ready for delivery on or about June 15, 1928.

Oyster Bay, L. I., May 30,—[Special.]—Thirty-eight acres of meadow and stretching along the southern above of Oyster Bay, which was once proposed as a park site by Theodore Roosevelt himself, was dedicated here this afternoon as the Roosevelt Memorial park. Quentin Roosevelt Jr., unfurled the flag officially opening the recreation ground to the public. The ceremony was attended by a large gathering.

Yankee Division Veterans Meet in Chicago June 1

Scenes of the battles they fought ten years ago will be shown to several thousand veterans of the Yankee division from Wisconsin, Illinois and other midwestern states on June 11, when they gather here as the guests of Voiture 220 of the Forty and Eight, for the purpose of forming an association and holding a reunion. Some of the soldiers may see themselves in action, for the moving pictures to be shown are official ones taken at the front by Capt. Edwin Cooper.

Directors of the Field Museum of Natural History last night announced the appointment to the staff of the department of botany, of Dr. Paul O. Standley, famous botanist, who for nineteen years has been associate curator of the herbarium of the United States National Museum at Washington, D. C. Dr. Standley will be associate curator of the herbarium, which contains almost the only important collection of Yucatan plants in the world. One of the botanist's first duties, it is announced, will be the study and classification of the museums collection of tropical woods of the Americas. He will conduct this jointly with Prof. Samuel J. Record, a member of the museum staff and one of the faculty of the Yale school of forestry.
